

♦ P1: Introduction to Vulnerabilities and OWASP Top 10

Aim

To understand common web application vulnerabilities such as SQL Injection and Cross-Site Scripting (XSS).

Tools Required

Docker Desktop (Windows), OWASP Juice Shop

Procedure

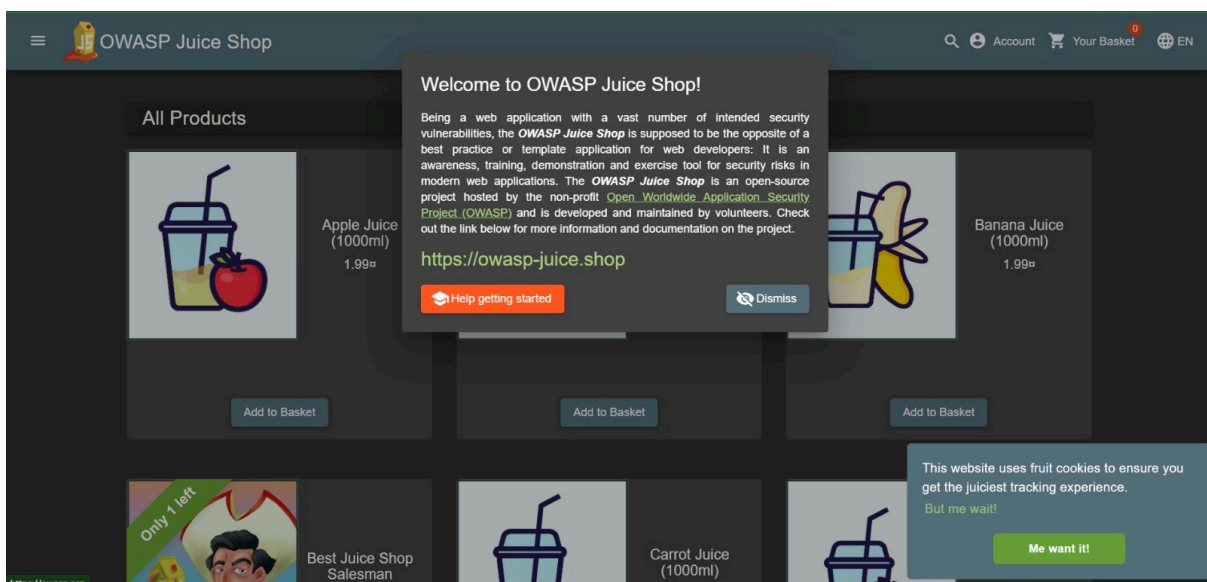

Step 1: Setup Juice Shop

- Install and open Docker Desktop.
- Run the Juice Shop application container.
- Open browser and access the application on localhost.

```
(kali@HP15s)-[~]  
$ docker run -d -p 3000:3000 bkimminich/juice-shop
```

Step 2: Access Application

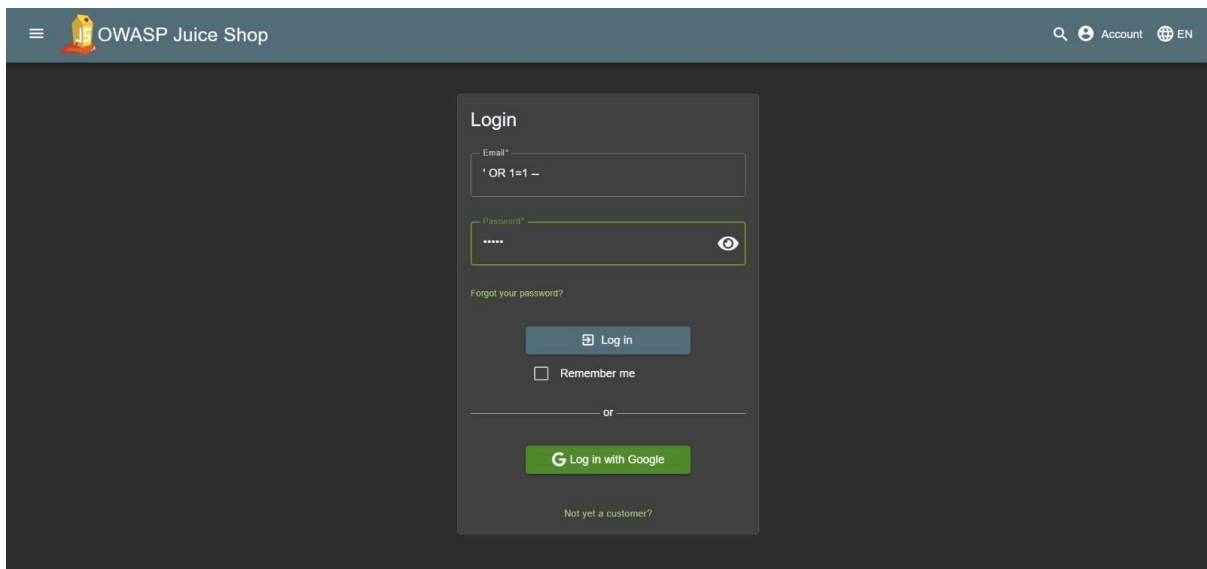

- Open the Juice Shop homepage in browser.

Step 3: Perform SQL Injection

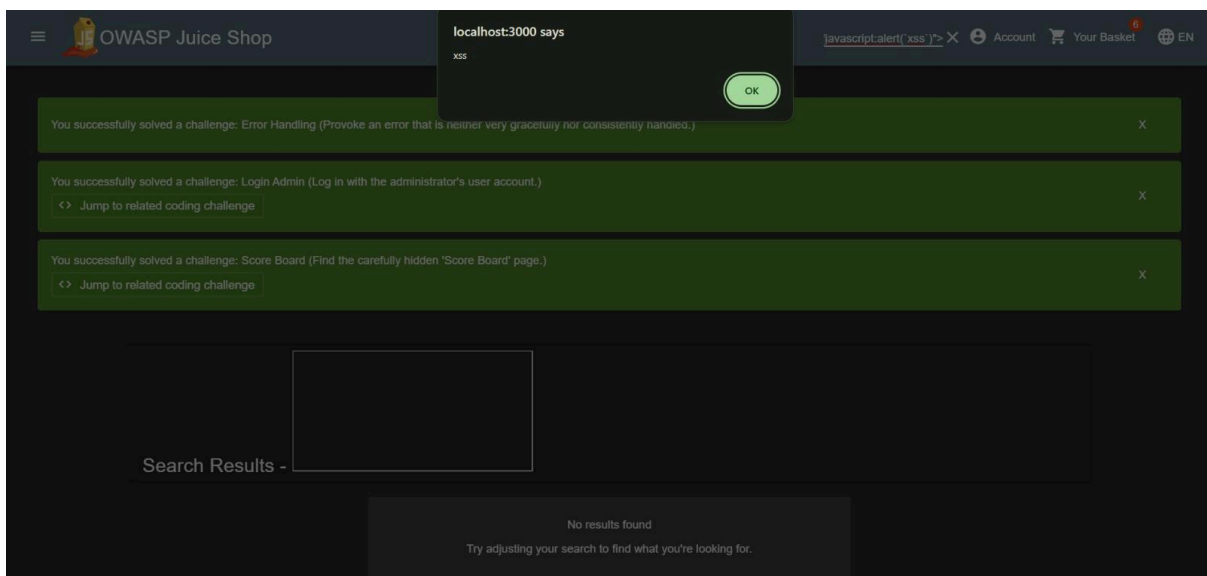

- Go to login page.

- Enter a malicious input to bypass authentication.

Step 4: Perform XSS Attack

- Enter a script in any input field (search/feedback).
- Observe popup execution.

Result

Successfully performed basic web vulnerability testing using OWASP Juice Shop.
